DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, subsection (d), "said cylindrically shaped body portion" lacks antecedence.

Claims that have not been specifically mentioned are rejected since they depend from claims rejected under 35 U.S.C. § 112, second paragraph.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 3,279,514 to Mintz (Mintz).

Mintz discloses a compartmented cupholder comprising a flexible wall 12 of flexible fabric defining a cylindrically shaped body. The flexible fabric of Mintz meets applicant's recitation of "a flexible mesh sidewall". The cupholder of Mintz further

Art Unit: 3727

comprises a flexible bottom wall 40 connected to the sidewall and curved partition walls 18 of fabric material interconnected with the sidewall and disposed interiorly of a central portion of the cylindrically shaped body dividing the central portion into equal sized compartments. The Mintz cupholder includes a closure 16 for closing the top portion of the cylindrically shaped body.

Having met the structure of applicant's claims, the cupholder of Mintz is inherently capable of performing as a laundry bag for holding small laundry items.

5. Claims 1-10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,797,491 to Fierek et al. (Fierek et al.).

Fierek et al. discloses a compartmented tool carrier-organizer comprising a flexible wall 14 of flexible fabric defining a cylindrically shaped body. The flexible fabric of Fierek et al. meets applicant's recitation of "a flexible mesh sidewall". The tool carrier-organizer of Fierek et al. further comprises a flexible bottom wall 18 connected to the sidewall and partition walls 34 of fabric material interconnected with the sidewall and disposed interiorly of a central portion of the cylindrically shaped body dividing the central portion into equal sized compartments. The Fierek et al. tool carrier-organizer includes a closure 90 for closing the top portion of the cylindrically shaped body.

Regarding claims 6 and 10, when the tool carrier-organizer of Fierek et al. is closed by closure 90, the flexible partition walls 34 would form wrinkles or gathers, which meet the recitation "said first, second, third and fourth partition walls are curved.

Having met the structure of applicant's claims, the tool carrier-organizer of Fierek et al. is inherently capable of performing as a laundry bag for holding small laundry items.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mintz or Fierek et al.

8. Mintz and Fierek et al. each disclose the claimed invention except for the sidewall, bottom wall and partition walls being formed of a net material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to net material to form the sidewall, bottom wall and partition walls of Mintz or Fierek et al., since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

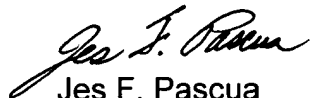

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
